GEORGE FETHERS & CO.
TRADING PTY LTD SINCE 1865 PANELS

PANELS

PANEL SHEET INFORMATION

All decors are available as 3000×1200 pressed panels. If you wish you buy the laminate alone, the size will be 3050×1220 .

All decors can be pressed on substrate ranging from 3mm to 50mm thick.

G1S (good one side) and G2S (good two sides) options available for all pressed panels.

EDGING

Matching edging is available in all decors.

CERTIFICATION

We have PEFC/FSC certifications as well as fire rating certificates on all panels.

George Fethers & Co. have been inspiring people to create beautiful interiors and exteriors since 1865.

Over the past 160 years we have worked closely with some of Australia's leading architects, interior designers, and builders, supplying products and materials of the highest level of performance and aesthetics.

Pre-finished & highly durable

Lignapal is a range of natural timber veneer, pre-finished with a highly durable polyurethane coating.

The panels are enhanced by state-of-the-art European factory finishing to showcase the timber's natural beauty.

A luxurious choice for kitchen and bathroom cabinetry, joinery and wall panelling.

The Lignapal range is suitable for residential and commercial settings, with 48 colour options to suit your design intent.

CELLUPAL

Stunningly accurate timber-look laminate

A cost-effective substitute for timber veneer, Cellupal laminate features a woodgrain texture that looks just like lightly brushed timber.

Engineered from wood-derived cellulose using the latest technology, Cellupal panels are ideal for joinery and panelling in domestic or commercial settings.

Cellupal low-pressure laminate (LPL)

Features a durable polyurethane coating for a more refined look. Ideal for:

- · Vertical surfaces
- Cabinetry in kitchens, bathrooms, and wardrobes
- Joinery
- · Wall panelling
- · Ceilings

Cellupal \bigoplus high-pressure laminate (HPL)

Features a melamine resin coating for superior scratch resistance. Ideal for:

- High-traffic, high-touch applications
- · Horizontal surfaces
- · Benches
- · Shelves
- Workstations
- Desktops
- Bar fronts
- $\bullet \ \ Reception \ counters$

Please note

Every Cellupal decor can be supplied as LPL or HPL and specified for different areas of the same project. However, there may be slight variation in tonality as a different manufacturing process is used for the two finishes.

Painted matt finish & woodgrain feature

A unique take on prefinished timber veneer, Blok combines solid colour two-pack paint with just the right amount of gloss to highlight the timber grain.

The result is a tactile yet durable matt timber veneer that celebrates the beauty of European Ash with a contemporary, matt aesthetic. Made by man, textured by nature.

Advanced technology

Asymmetric mismatched European Ash veneer leaves are spliced together and pressed onto infused kraft paper.

Gentle brushing removes some softer earlywood between the growth rings, giving the panels a distinctive, tactile quality.

Then, several coats of durable two-pack paint are applied to provide Blok's unique matt finish with a subtle wood grain texture.

For residential & commercial applications

Blok is ideal for conventional veneer or laminate applications in residential and commercial projects:

- Kitchen, bathroom, and wardrobe joinery
- · Commercial fitouts
- Furniture
- · Wall and ceiling panels
- Horizontal surfaces, such as shelves, workstations, and benches (excluding food preparation surfaces).
